There are various Cognitive effects of Video Games on Humans but some are positive and some are negative :

If you are addicted to games, then the consequences are very bad.

But we highlight only the positive effects.

Video Games play an important role in everyone's lives. From childhood to old age, all play video games and that enhances their Memory.

Life of a Gamer in video Games is somehow the same as the life of a person in real life.

Virtual games can improve Mental skills ,such as

1. Problem solving and logic building: Various games trained the person's mind to come up with various ways to solve problems and other problems in short bursts.

2. Enhance Memory power and Concentration:

3. Multitasking, managing multiple objectives: Many Games give multiple objectives or rounds that are completed in a given time with various difficulties.

4. Hand-eye coordination, spatial skills: Hand eye coordination is very important in video games to defeat opponents. It is also suggests that people can learn iconic, spatial, and visual attention skills from video games.

5. Quick thinking and making fast analysis and decisions: Games like Racing games you have to make quick decisions also in real life.

6. Accuracy: In games as well as in real life it is important to move quickly without sacrificing accuracy.

7. Strategy and Anticipation: Make different strategies to cope up with daily problems in real life and defeat your opponent in games.

8. Mapping: Gamers use a game map or build map in their mind to navigate in the virtual world.

9. Situational awareness: Players come with a mindset to change according to the situation.

10. Perseverance: Players must keep on trying to succeed and move on to the next level.

11. Developing reading skills, maths skills, reasoning, pattern recognition, management skills etc.

12. Teamwork and Cooperation when played with others: Games like multiplayer games teamwork is very important to win and cooperate with their decisions . The same we should use in real life.

13. Risks taking: By taking risks, gamers can achieve their goals.

14. How to respond to challenges, frustrations , how to explore, planning, resources management and logistics.

15. Simulation, real world skills: The plane simulators ,cars simulators etc play an important role in a gamer's life. Simulators act as the real world in which you face the same difficulties as in the real world.

16. And there are various Cognitive effects of video games.

#### GAMES AS CAREERS:

It is also related to Cognitive Development.
